## **General:**

1. Pizza.io considers the price for one pizza to be US\$15 – this is the average price for the pizza at Papa John's in Florida.
2. Bitcoin price will be obtained from Yahoo Finance on the 26th at 00:01 GMT date of each current month.
3. While you may submit as many predictions as you want, your first submission will count as your entry. This means the more entries you have does not increase your chances of winning. However, a new prediction (i.e. new entry) can be made on the 1st date of the following month.
4. Pizza.io reserves the right to make amendments, suspend or cancel the promotion at any time.
5. Pizza.io reserves the right to cancel/limit the Pizza.io feature for individual users at our discretion.
6. If we determine a user is involved in any suspicious and/or fraudulent activity, Pizza.io reserves the right to undertake a KYC process, cancel the user's entries, remove the user from the current promotion, exclude them from all future promotions and not fulfil any winnings.
7. These Terms and Conditions may be published in several languages for informational purposes and ease of access by players. The English version is the only legal basis of the relationship between you and us and in the case of any discrepancy with respect to a translation of any kind, the English version of these Terms and Conditions shall prevail.
